Jiminy for us, provides immense value across the entire organisation. First and foremost in our customer-facing roles, where we use it to record calls & meetings, for managers to coach reps, knowledge sharing, onboarding and the list goes on.

"Really useful tool - how did we work without it before?"

I like the functionality of course, but the very bespoke and readily available Jiminny support is really outstanding. From integrating with our other systems, to training the teams the support that we get from Jiminny is great

"Great tool and even better support"

The product itself is fantastic for coaching, even more so with a remote team. The playlists are a great feature, and the stats breakdown on calls helps identify areas of success and things to improve. Product aside, the Customer Success team is fantastic. A level of support and care that is very rare to find.
